PROJECTS

City Diary | Software Engineer | February 2022 | **GitHub:** github.com/HCJM/City-DiaryV2

A React Native mobile app for recording and uploading audio. Users can pin audio to their location and store it in Firebase Cloud Storage. Recorded audio can be set as private or public during upload.

- Developed a burger menu with sign-out functionality and seamless user authentication using Firebase Authentication, collaborating through pair programming
- Implemented user geolocation permissions using the Expo location library to track and display location information on our main interactive map feature
- Performed app quality assurance on Android devices, detecting and resolving bugs and oversights

Fullstack Spirits | Software Engineer | December 2021 | **Railway:** fullstackspirits.up.railway.app/

An e-commerce web app using React for browsing, purchasing, and account management. Features include guest checkout, order history for registered users, and role-based actions for admins.

- Built interactive user interfaces using React components, effectively managing state using Redux
- Designed and developed a RESTful API incorporating authentication middleware in Express routes
- Code reviewed and assigned tasks, rotating between git-master and taskmaster using SCRUM principles
